16. END ITEM OR SERVICES FROM THIS CONTRACT/IMPROVEMENT OVER CURRENT SYSTEM, EQUIPMENT, ETC. This contract will result in a prototype easel to be installed on existing equipment.		
17. SUPPORTING OR RELATED CONTRACTS (Agency & Other)/COORDINATION From contracts throughout industry and the intelligence community, it has been determined that a vacuum easel of this type and size has not been built.		
18. DESCRIPTION OF INTELLIGENCE REQUIREMENT AND DETAILED TECHNICAL DESCRIPTION OF PROJECT (Continue on additional page if required) The present VG-1 easel requires weights to hold down paper during the exposure cycle. If the paper is not absolutely flat the image will not be in focus at all points on the paper and valuable intelligence information can be lost. In addition, the use of weights is time consuming and wasteful of film since areas covered by the weights must subsequently be trimmed.
